

ANALOG TO DIGITAL: INTELLIGENT-PROCESSES-AS-A-SERVICE HOW YOU CAN ACHIEVE EXCELLENCE IN YOUR PROCESSES

Benefits at a Glance

The efficient definition, optimization, control, and automation of company-wide production and business processes will decide the future of your business. Define the optimum customer journey and supply chain based on digital processes, and accelerate your entire value-added chain. This is how you can reach your corporate goals sustainably.

What matters to you

- Achieve great customer satisfaction along the customer journey
 - Offer exceptional attractiveness to your suppliers along the supply chain
 - Lead your industry with extremely high returns thanks to process efficiency
 - React to changing market conditions with agile processes
 - Receive outstanding ratings from stakeholders such as investors and institutes
 - Generate great employee satisfaction and attractiveness as an employer
- Secure competitive advantages such as cost and efficiency leadership, quick throughputs, and high quality
 - If desired, use an efficient complete service

These success factors are essential

- The use of cutting-edge, pioneering digital technologies
- Integration of the expert knowledge resident in the specialist departments
- Efficient team cooperation
- Stable integration of business, production, and IT applications
- A well-founded analysis of the company-wide process landscape
- Precise analysis and elimination of bottlenecks and delays
- Clear recommendations for quick, ad-hoc improvement and final optimization
- Automation of high-volume processes that reduce time and costs
- Design of individual processes according to proven methods (BPMN 2.0)

- Secure encryption and archiving of information, data, and documents in an audit-capable, tamper-proof form
- Clearly defined processes with certification, access privileges, and data protection
- Audit-capable quality management for securing product and service quality

What we provide during implementation

Everything from a single source, from a strong partner: Hanselmann & Compagnie GmbH digital. You get conceptual design, introduction, and operation on the basis of leading technologies as a comprehensive service: efficient, quick, and focused. This is ideal when internal personnel and investment resources are limited.

This is ideal when internal personnel and investment resources are limited.

Benefits delivered to you by future-oriented digital technologies

- Process Intelligence (PI)
